EJTM Special: News on Muscle Imaging

Clara Franzini-Armstrong, Paolo Gargiulo, Roberto Stramare, Guest Editors

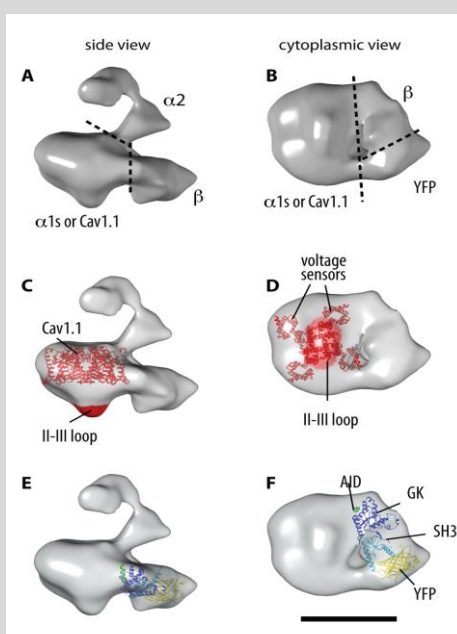

- Reviews**
- 5 Electron microscopy: from 2D to 3D images with special reference to muscle
Clara Franzini-Armstrong
 - 15 Revealing t-tubules in striated muscle with new optical super-resolution microscopy techniques
Isuru D. Jayasinghe, Alexander H. Clowsley, Michelle Munro, Yufeng Hou, David J. Crossman and Christian Soeller
 - 27 3D structure of the dihydropyridine receptor of skeletal muscle
Montserrat Samsó
 - 35 Single-particle cryo-EM of the ryanodine receptor channel in an aqueous environment
Mariah R. Baker, Guizhen Fan and Irina I. Serysheva
 - 49 Skeletal muscle triad junction ultrastructure by Focused-Ion-Beam milling of muscle and Cryo-Electron Tomography
Terence Wagenknecht, Chyongere Hsieha, Michael Marko
