Basic and Applied Myology

Hot Section: Satellite Cells and Myoblast Transfer Therapy

M Grounds, Guest Editor

- | | | |
|-----------|-----|--|
| Editorial | 160 | M Grounds: <i>Satellite cells and myoblast transfer therapy</i> |
| Articles | | I. Behaviour of satellite cells in vitro |
| | 161 | <i>Myoblast transplantation in the mouse: what cells do we use?</i>
A Irintchev, M Langer, M Zweyer and A Wernig |
| | 167 | <i>Satellite cell proliferation: starting point and key steps to regeneration and cell-mediated gene therapy</i>
VMouly, S Decary, RN Cooper, JP Barbet and GS Butler-Browne |
| | 177 | <i>The role of growth factors in myoblast transfer therapy</i>
JJ Bower, JD White, JB Kurek, CM Muldoon and L Austin |
| | 189 | <i>Proliferative dynamics and the role of FGF2 during myogenesis of rat satellite cells on isolated fibers</i>
Z Yablonka-Reuveni and AJ Rivera |
| | 203 | <i>Characterisation of stem cells in adult mouse muscle</i>
K Blaveri and JE Morgan |
| | 211 | <i>Exogenous genes are expressed in mdx muscle fibres following the implantation of primary mouse skin cells</i>
JB Relvas, H Aldridge, KE Wells, DJ Wells and DJ Watt |
| | | II. Host response to cell transplantation |
| | 221 | <i>Myoblast transplantation: a brief review of the problems and of some solutions</i>
J Tremblay and B Guerette |
| | 231 | <i>Increased survival, movement and fusion of myoblasts from sliced muscle grafts into skeletal muscles of T-cell depleted and tolerated dystrophic host mice</i>
Y Fan, MD Grounds, M Garlepp and M Beilharz |
| | 241 | <i>Autologous myoblast transfer: a combination of myoblast transplantation and gene therapy</i>
SS Floyd, DK Booth, JCT Van Deutekom and J Huard |
| | 251 | <i>Dystrophin levels required for genetic correction of Duchenne muscular dystrophy</i>
JS Chamberlain |
| | 257 | <i>The functional status of dystrophic muscles and functional recovery by skeletal muscles following myoblast transfer</i>
JA Faulkner, SV Brooks, RG Dennis and GS Lynch |
