Registration and login are required to submit items online and to check the status of current submissions.

How to submit your paper

To submit a paper to the *European Journal of Translational Myology*:

1. [Register](#) as an Author; we encourage you to register also as a Reader and a Reviewer at the same time;
2. Compile your paper following the Journal's requirements below. You are also advised to [download](#) and follow PAGEPress Guidelines for Authors for a more detailed description of how to prepare manuscripts;
3. Read our [Editorial policies](#) and our [Competing Interest policies](#).

To submit a revised version:

1. [Log in](#);
2. Click on your role as Author;
3. Click on IN REVIEW: REVISIONS REQUIRED or RESUBMIT FOR REVIEW on the page displayed (under the heading STATUS, near the manuscript title);
4. Under the heading EDITOR DECISION, upload your revised paper as AUTHOR VERSION using Browse and Upload buttons;
5. Use the NOTIFY EDITOR e-mail button to inform the Editors that the revised version has been submitted.

Guidelines for Authors

Manuscripts have to be single-spaced with one-inch margins. Each page must be divided in two columns. Headings must be used to designate the major divisions of the paper. To facilitate the review process, manuscripts should contain page numbering.

Manuscripts must be written in English. Authors whose native language is not English are strongly advised to have their manuscript checked by a language editing service, or by an English mother-tongue colleague prior to submission. As an option, PAGEPress offers its own professional copyediting service. In case you feel that your manuscript needs a professional English language copyediting checking language grammar and style, PAGEPress offers a chargeable revision service in a few days. This service is available as well to Authors who do not submit their manuscript to our Journal. Please contact Ms [Lucia Zoppi](#) for any query/support you may need.

First page

The first page must contain: i) title (lowercase), without acronyms; ii) first name and last name of each Author, separated by commas; iii) affiliation(s) of each Author (in English); iv) acknowledgments; v) full name and full postal address of the corresponding Author. Phone, fax number and e-mail address for the correspondence should also be included; vi) three to five key words. The second page should contain: i) [Authors' contributions](#), e.g., information about the contributions of each person named as having participated in the study; ii) [disclosures about potential conflict of interests](#); iii) further information (e.g., funding, conference presentation ...).

Main text

If *tables* are used, they should be single-spaced on separate pages. They should be numbered and cited in the text of the manuscript consecutively.

If *figures* are used, they must be submitted as .tiff or .jpg files, with the following digital resolution:

i) color (saved as CMYK): minimum 300 dpi;

ii) black and white/grays: minimum 600 dpi;

A different caption for each figure must be provided at the end of the manuscript, not included in the figure file.

If *abbreviations* are used in the text, Authors are required to write full name+abbreviation in brackets [e.g. multiple myeloma (MM)] the first time they are used; then, only abbreviations can be written (apart from titles; in this case Authors have to write always the full name).

If *names of equipment or substances* are mentioned in the text, brand, company names and locations (city and state) for equipment and substances should be included in parentheses within the text.

Articles sections

Original Articles (3500 words max, abstract 250 words max, 50 references max, 3/5 tables and/or figures): Reports of basic and applied research in the field of emergency care. In general, this kind of publication should be divided into an Abstract, Introduction, Materials and Methods, Results, Discussion, Conclusions and References. A maximum of 10 Authors is permitted and additional Authors should be listed in an *ad hoc* Appendix.

Reviews (5000 words max, abstract 250 words max, 40 to 100 references, 3/5 tables and/or figures): Reports introduced by a general summary of content in the form of an Abstract. Following a short introduction, putting the study into context and defining their aim, reviews will concentrate on the most recent clinical updates in the field and summarize the state-of-the-art literature. A review should clearly describe the search strategy followed (key words, inclusion, exclusion criteria, search engines, ...). No particular format is required; headings should be used to designate the major divisions of the paper.

Case Reports (about 2000 words, abstract 150 words max, 20 references max, 3 tables and/or figures): Reports describing observations on clinical cases that can be educational, including adverse effects of drugs or outcomes of a specific treatment. They should be divided into: Abstract, Introduction (optional), Case report(s), Discussion, Conclusions and References.

Letters to the Editor (800 words max): Letters to the Editor are written on invitation. They are short essays that express the Authors' viewpoint, may respond to published manuscripts in the Journal, or deliver information or news regarding an issue related to the Journal's scope. If the letter relates to a published manuscript, the Authors of the original manuscript will be given the opportunity to provide a respond.

Editorials (about 1000 words, no abstract required): These contributions are usually invited or addressed by Editors about emerging or important issues in the field of translational myology.

Book Reviews (no abstract, nor references needed): They should be a short critical analysis and evaluation of the quality, meaning, and significance of a short book which addresses at least one of the main topics of the Journal. The Authors should contact the Editor-in-Chief of the Journal for his/her approval before submitting a Book Review.

References

References must be numbered consecutively in the order in which they are first cited in the text (not alphabetical order), and they must be identified in the text by Arabic numerals in superscript. References in the main text must always be cited after dots and commas. References to personal communications and unpublished data should be incorporated in the text and not placed under the numbered references [Example: (Wright 2011, unpublished data) or (Wright 2011, personal communication)]. References in the References section must be prepared as follows:

- i) more than three Authors, cite 3 Authors, et al. If the paper has only 4 Authors, cite all of them;
- ii) title style: please use a capital letter only for the first word of the title;
- iii) journal titles mentioned in the References list should be abbreviated according to the following websites:
 - a. ISI Journal Abbreviations Index (<http://library.caltech.edu/reference/abbreviations/>);
 - b. Biological Journals and Abbreviations (<http://home.ncifcrf.gov/research/bja/>);
 - c. Medline List of Journal Titles (ftp://ftp.ncbi.nih.gov/pubmed/J_Medline.txt);
- iv) put year after the journal name;
- v) cite only the volume (not the issue in brackets);
- vi) pages have to be abbreviated, e.g., 351-8.
